Pharmacy Shipment Form (170 KB...

Valerie,

The correct shipment address is listed below as well as on the sample study drug shipment form that I have attached. This is a sample form, not a mandatory form that gives shipping instructions for study drug. You may find it useful, but again it is not mandatory for you to use the form other than as a reference.

I think your plan should work. We should be able to rotate the cigarettes into the humidor as we remove them for dispensing. We may be able to pack more cigarettes into the humidor by removing some of the shelving. Overall, I think your plan should work.
Please do not hesitate to call or e-mail if you have any questions, or if I can assist you in any way.
Lori

Lori:
Can you please confirm the correct shipping address for the cigarettes?

Also let me clarify - we want to send 52 (not 42, that was a typo) 12M cases in the first shipment. We think that rotating stock into the humidor for the 3 day period prior to dispensation, similar to what they are doing in Lincoln, should be acceptable for the Phoenix site. However, if the wholesaler has to leave the stock in an unconditioned space for an extended period of time we might want to condition the product in the humidor for a longer period prior to dispensation. We are trying to confirm this with the wholesaler and will advise you if different conditioning needs should be required.

I will be able to advise you of the delivery date as soon as it is provided to me. My target is to have the inventory to the PHX site no later than

October 13 (giving you a week for conditioning and repackaging).

Please let me know on Tuesday about the shipping address and if the approach
outlined above will work for you.

Thanks,
Valerie

Valerie,
I had not heard back from you and I wanted to double check that the first communication was received and that there was no confusion. I left a voice message for you this morning. One clarification that probably should be made is if the 42 cases you are referring to are 6M or 12M cases. When I said we could place approximately 22 cases in our humidor, I am referring to the 6M cases as that is how we receive them from the local distributor after tax stamping. I also asked about the rotation of stock into the humidor if all 42 cases are delivered at once, or if the local distributor has a humidor or environmentally controlled spot that they could hold the balance of the shipment. If not, shipping all 42 cases to us and having us rotate stock into the humidor as it was used would be the better option. Please let me know when I would expect shipment and what the plan is.
Thank you in advance for your response.
Lori

Lori:
Kim Prchal provided me with your name as the contact point for the pharmacy
at the PHX site.

I am in the process of initiating the shipment of study product to the PHX
site for the clinical conduct of the MARL/01/03 and MARL/02/03 studies.
Because we will need to coordinate shipment of this product through a wholesaler, we'd like to minimize the number of shipments to PHX. I would
like to send a total of 42 cases of cigarettes to PHX in the first shipment,
but I am uncertain of whether your site could accommodate such a quantity.
Could you please advise (no later than this Wednesday) what the maximum
quantity of cigarettes is that you would be able to store (at one

time) for
these studies?

Once I have that information I can determine how many shipments we need to
be planning for.

If you have questions, please feel free to contact me.

Thanks,
Valerie
